

WARNING

Cura and Cura4 brakes are using a straight hose in the caliper. In this configuration, you need to pay attention on the inclination of the hose during the mounting phase.

Maximum inclination authorized with straight hose mount : the hose should not curve more than 30mm radius. You also need to consider the rear suspension movement with the complete travel.

If you need to use a superior curve radius, we advise you to use the specific kit made for it. In case that you didn't respect this warning, it can damage the hose near to the connection at the caliper. Those damages will not be covered by the warranty.

Here are the spare parts for the specific kit :

- FD40283-10 : Banjo adapter kit
- FD50541-00 : Banjo hose (black matte)
- FD50542-00 : Banjo hose (glossy black)
- FD50543-00 : Banjo hose (Kevlar)
